

8:40 Meeting - Tuesday, 13 November 1973

1. Contacts with Southern Railways: One of the organizations with which we developed contact as a result of our dealings with the Washington Board of Trade is Southern Railways, Inc. Southern Railways was previously given a copy of our register of prospective employees. Yesterday they asked for the resumes of seven of those persons.

2. Recruitment Trip: [redacted] recruiter, STAT
has reported great success on his visits with [redacted] to STAT
the University of Texas, Texas A&M, and Rice University last week.
They were well received in their briefings to senior science-economist faculty members. In addition, they interviewed a total of 26 students, most of them MA and PhD candidates. Application forms were given to 14.

3. Co-op and Summer Interns: There was a dramatic reversal from apathy to interest at Rochester Institute of Technology last week as opposed to the one in April 1973. Instead of 12 in the audience for the group presentation and three interviews, there were 70 listeners, half of whom requested interviews. Half of these were Photoscience majors interested in NPIC's Summer Intern Program.

4. Classified Bulletin Board: The Chairman of the Fine Arts Commission has requested that new title cards be prepared for the Classified Bulletin Board. OBGI is making the cards.
